

Style Control

Written by Administrator
Monday, 24 May 2010 12:25

Preview all available styles and any associated combination at the [Preset Styles](#) page.

The system allows you to quickly and effortlessly customise a preset to your liking, editing options to meet your requirements such as Font Settings.

Control the Preset Settings via the template manager here: **Extensions** ▯ **Template Manager** ▯ **rt_somaxiom_j15** ▯ **Presets**

After adjusting the parameters and on selection of a preset style, the administrator automatically updates the settings to match that particular style.

- **Sidebar Class SFX:** Insert the name of the suffix you wish for the Splitmenu sidebar to inherit
Menu Section - (text field)

Note: The **Gantry Framework** offers the ability to configure almost all of the available parameters, on a **per menu item** basis. For example, you can assign preset2 to one page and preset4 to another, all within the **Gantry** administrator.

Creating your own Preset Styles

The Gantry Framework has an interface for creating your own custom presets via the template administrator. You do not need to edit the presets (or add your own) in the gantry.config.php file - although, it is still possible if you wish to do so.

Simply go to **Extensions** ▢ **Template Manager** ▢ **rt_somaxiom_j15** ▢ **Settings**, configure the options to fit your purposes, then click the **Save Custom Presets as New** button in the **Presets tab**. Follow the naming procedure on the popup then the custom preset will appear in Presets Showcase.

Quick and Simple!

The Somaxiom template has a plethora of configuration options available, many more beyond these Style Controls, simply go to **Extensions** ▢ **Template Manager** ▢ **rt_somaxiom_j15** and hover over the options for tips with descriptions to appear.

Assigning a Style to a Specific Page

With Gantry, the ability to assign a certain style to an individual page has never been easier and/or more efficient. Just follow these simple steps:

- Go to **Extensions** ▢ **Template Manager** ▢ **rt_somaxiom_j15**
- Select the **Menu Items** tab - located in the right column of the page in the orange box
