

Somaxiom is the first template to be driven by **Gantry v3.0**. There are several major features in this Gantry release, ranging from

iPhone

support, to

Google Web Fonts

, to

Smart Loading

, several bug fixes and much more.

iPhone Platform Theme

This version of **Gantry** expands its browser portfolio to **iPhone's** Safari, producing a **mobile** version of the

Somaxiom

template for all visitors using the popular smartphone.

- **iPhone Theme:** An iPhone specific layout, combining pre-existing template elements with mobile specific styling.
- **Aliases:** Assign current module positions to mobile equivalents such as *mobile-header* & *header-a*

Google Web Fonts

Google have launched their new **font directory** service, which offers a **Font API** for web developers to load

Custom Fonts

straight from their servers.

- Preview all available Google fonts from the Google Font Directory located [here](#)
